Communication Plan

Treavue — Personalized Travel Itinerary Planner

Project documentation prepared for portfolio and repository use

Audience

College evaluators, peers, recruiters, and users interested in travel-planning software.

Core message

Treavue organizes trip preferences into an editable daily itinerary and provides trip management with persistent storage.

Suggested presentation flow

- Introduce the problem and goal.
- Show homepage and destination exploration.
- Create a trip and enter preferences.
- Generate and review itinerary.
- Explain estimated costs and route caveats.
- Show saving/editing trips.
- Briefly describe architecture and limitations.

Communication principles

- Use plain language.
- Show actual working behavior.
- Do not claim live information unless verified.
- Explain estimates and security limitations.
- Avoid showing secrets, personal account information, or private environment files.

Closing

Summarize user value, current functionality, known limitations, and the next security/data-quality milestones.
