Demonstration of Proposed Features

Treavue — Personalized Travel Itinerary Planner

Project documentation prepared for portfolio and repository use

Demo 1 — Destination exploration

Open the home page and browse destination cards/details supported by the current build.

Demo 2 — Personalized itinerary

Create a sample trip; choose dates, traveler count, budget, interests, pace, transport, and needs; generate the itinerary.

Demo 3 — Daily schedule

Open each day and show activity names, times, durations, locations, and any notes.

Demo 4 — Budget estimates

Show available cost information and explain that values are estimates where applicable.

Demo 5 — Trip management

Save a trip, revisit it, edit or rename it, and demonstrate other available actions.

Demo 6 — Persistence

Show a trip remains after refresh when cloud storage is configured; do not claim cross-user security unless verified.

Demo 7 — Chat

Demonstrate the existing chat only if it works in the current environment.

Demo hygiene

Use sample travel data; hide secrets; avoid public security claims while ownership checks are incomplete.
